Use-Case Name: 5.0 – Accept Tutee

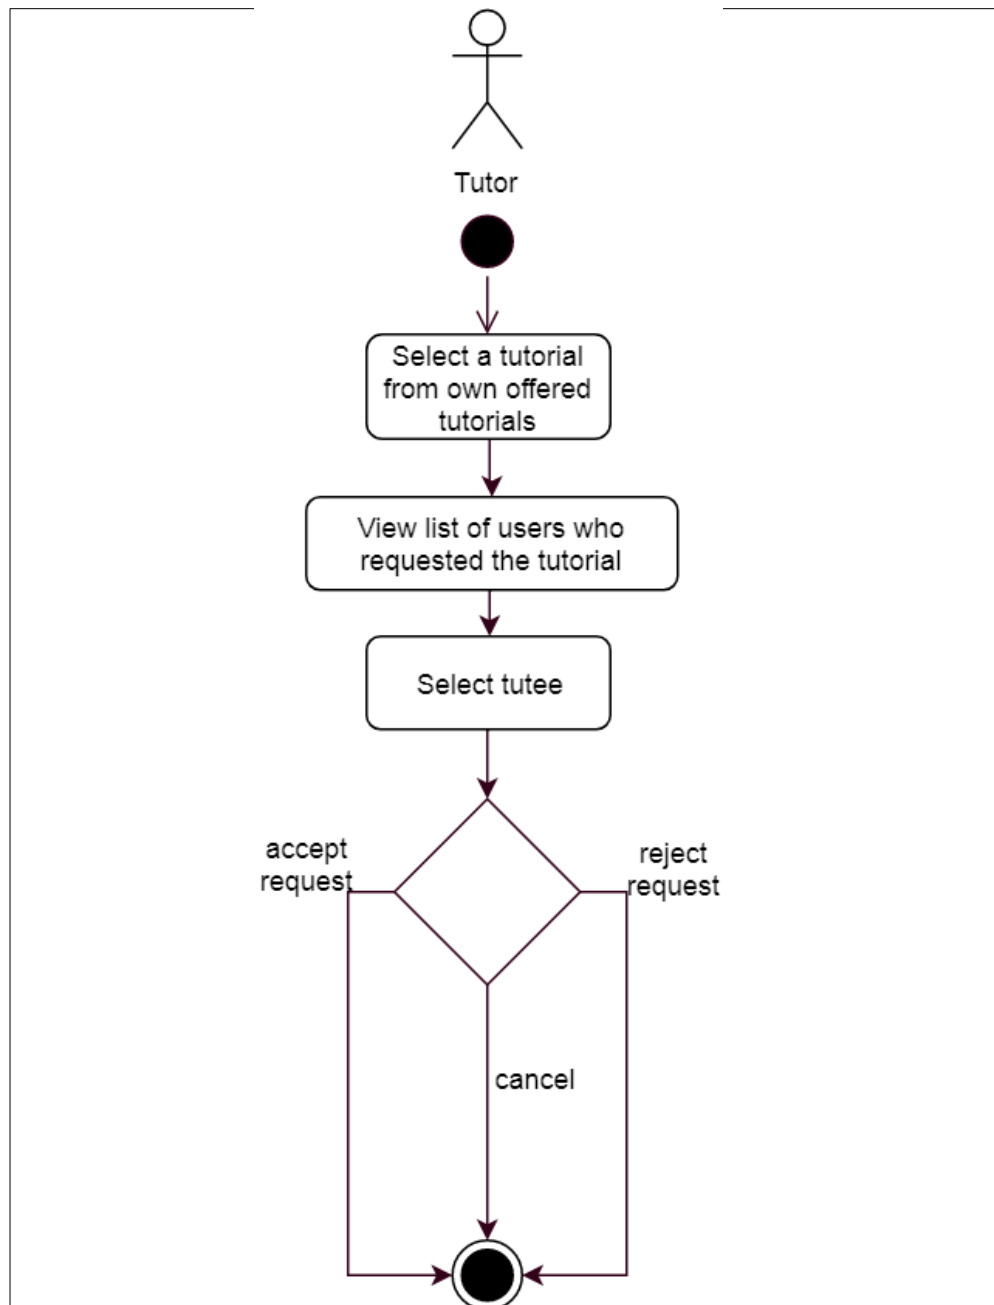

Description: The use case allows the user to accept a tutee. Whenever the user offers a tutorial, other users can request the user to take them as their tutee. The user can select a tutee from a list of users who made a request on a particular tutorial they offered.

Preconditions: Logged in. Must have offered a tutorial.

Flow of Events:

| Scenario Name | Description |
|---|--|
| Scenario 1 (Basic Flow) User accepts a tutee | 1. User selects a tutorial from their offered tutorials. 2. User selects a tutee from the list of those who requested the particular tutorial. 3. User accepts or rejects the request. |
